**Step 1:** If an even number is followed by an odd number then the resultant will be the addition of both the numbers.

**Step 2:** If an odd number is followed by a perfect square then the resultant will be the difference of that square number and the odd number.

**Step 3:** If an odd number is followed by another odd number (but not a perfect square) then the resultant will be the addition of both the numbers.

**Step 4:** If an odd number is followed by an even number (but not a perfect square) then the resultant comes by multiplying the numbers.

**Step 5:** If an even number is followed by another even number then the resultant will be the division of first number by the second number.
