 No other scourge in living memory has taken a toll of tens of thousands of lives in 18 months, although India has high chronic and invisible mortality due to disease and road traffic accidents. As of September 13, WHO recorded 4,45,768 COVID-19 deaths in India and 3,35,31,498 confirmed cases, indicating that the current ex gratia Spending outlay would be of the order of ₹2,300 crore. The relief amount proposed by the National Disaster Management Authority is to be paid out of the State Disaster Response Fund, which represents a dedicated facility to deal with notified disasters, including COVID-19; State authorities will create a people-friendly claims mechanism.
