(Reading Comprehension)

Screenshots of the
passage.

Read the given passage carefully and answer the questions that follow. Certain words are printed in bold to help you locate them while answering some of these.

Passage

According to the diaper maker Unicharm, in Japan, adult diapers now outsell baby diapers. That's because a quarter of the country's population is 65 or older. By 2060, that proportion will hit 40 percent. What adjustments have to be made when so many people grow old simultaneously? To take one example, after a recent surge in accidents involving older drivers, the government began testing the Robot Shuttle, an autonomous bus intended for use in rural areas, where Japan's shrinking pains have hurt the most. Other tweaks include slowing down escalators and equipping shopping carts with magnifying glasses.

Passage

11:30 – 12:30

It's long been observed that Japan's aging doesn't bode well for its economy. Lots of old people means a financial drain on both the private and public sectors, as health-care and pension costs skyrocket and productivity declines. But the news isn't all bad: Amid this elder boom, a new, 100 trillion yen (\$800 billion) consumer category has emerged, known as "the silver market." Millions of Japanese seniors who have long been saving for retirement find themselves at the center of a commercial bonanza. The products vying for their attention range from Docomo's Raku-Raku 4, a smartphone that's "easier to hear" and also has jumbo screen icons, to Fujisoft's Palro, a \$6,000 "carebot" that combats dementia through trivia games and fitness drills. Even video-game arcades, long a bastion of youth, are wooing goldenagers with benches for resting; arcadestaffers are encouraged to get certified as senior-friendly "service assistants."

QUESTION 21

Read the passage at least once.

What is the passage about?

- A. How Japan is handling its aging population, the percentage of which is quite high as compared to those of the young.
- B. Japan's economy is regressing badly as the maximum population is old and cannot contribute to the growth of the economy.
- C. Japan is a techno- friendly economy and the old people have not failed to embrace technology.
- D. Japan sells more diapers for the old than for babies.
- E. Japan has progressed so much in terms of technology that it is giving a huge challenge to the developed countries like the U. S. and the U.K.
