Increase in violent crimes, suicides in 2021 points to indirect consequences of pandemic

# ARTICLE

In a **worrying trend**, the registration in violent crimes such as rape, kidnapping, **atrocities** against children, robberies and murders increased in 2021 to levels set before the pandemic, in comparison to the drop in 2020, according to the annual report, “Crime in India” released by the NCRB earlier this week. The drop, in 2020, seemed to, therefore, be an **anomaly**, either due to lowered registration or a **partial decrease** in occurrence as there were **extensive** lockdowns and office shutdowns. While there was an increase in violent crimes in 2021, the overall crime rate (per one lakh people) decreased from 487.8 in 2020 to 445.9 in 2021, largely due to a decrease in cases registered under **disobedience** to a public servant’s order, relating to the lockdowns.

# ARTICLE

If 2020 was the year when India faced the first COVID19 wave, 2021 was equally a **fraught** year because of the effect of the Delta variant of the novel coronavirus; the frequency and **intensity** of the lockdowns were relatively lower in comparison to 2020. “**Cruelty** by husband or his relatives” constituted 31.8% of crimes against women, up from 30.2% in 2020 and 30.9% in 2019, indicating that **domestic violence** continued to be a major issue. While violent crimes increased, the charge sheeting rate fell from 75.8% in 2020 to 72.3% in 2021, as did the **conviction** rate (57% from 59.2% in 2020). So, law enforcement was less responsive in a year with more violent crimes.

# ARTICLE

Again these trends have to be read State wise — Assam (76.6 violent crimes per one lakh people), Delhi (57) and West Bengal (48.7) had the highest numbers while Gujarat, Andhra Pradesh and Tamil Nadu registered the lowest numbers. The report also revealed that the suicide rate in the population in 2021 — 12 per one lakh people was the highest in the last five years. Domestic problems (33.2%) and illnesses (18.6%) were reported as the main reasons, with most victims being daily wage earners (25.6%) and housewives (14.1%), **revealing** the **severity** of the pandemic and its indirect **consequences** on people. With India registering the highest excess deaths during the pandemic, in particular during the Delta wave according to the World Health Organization, these figures are not surprising.
