If all the letters are changed to the next alphabet in the alphabetical series, then how many words have at least one vowel? (Assume A comes after Z)

- (1) Three**
- (2) One**
- (3) Four**
- (4) Two**
- (5) None of these**

There are seven members A, B, C, D, E, F and G in a family, which consists of three generations. B is the husband of D's sister. G is the nephew of D. C is the granddaughter of E and sister of G. F is the wife of E and has more than one child.

एक परिवार में सात सदस्य A, B, C, D, E, F और G हैं, जिसमें तीन पीढ़ियाँ शामिल हैं। B, D की बहन का पति है। G, D का भतीजा है। C, E की पोती और G की बहन है। F, E की पत्नी है और उसके एक से अधिक बच्चे हैं।

There are seven members A, B, C, D, E, F and G in a family, which consists of three generations. B is the husband of D's sister. G is the nephew of D. C is the granddaughter of E and sister of G. F is the wife of E and has more than one child.

How is A related to E?

- (1) Sister**
- (2) Can't be determined**
- (3) Daughter**
- (4) Daughter-in-law**
- (5) Mother**

There are seven members A, B, C, D, E, F and G in a family, which consists of three generations. B is the husband of D's sister. G is the nephew of D. C is the granddaughter of E and sister of G. F is the wife of E and has more than one child.

How is D related to C, if E has only one daughter?

- (1) Aunt**
- (2) Paternal Uncle**
- (3) Mother- in- law**
- (4) Maternal Uncle**
- (5) Can't be determined**

There are seven members A, B, C, D, E, F and G in a family, which consists of three generations. B is the husband of D's sister. G is the nephew of D. C is the granddaughter of E and sister of G. F is the wife of E and has more than one child.

How is G related to E?

- (1) Sister**
- (2) Grandson**
- (3) Daughter**
- (4) Daughter-in-law**
- (5) Mother**

Ten people are sitting in two parallel rows containing five people each in such a way that there is an equal distance between adjacent persons. In row 1 – A, B, D, E and C are seated (but not necessarily in the same order) and all of them are facing south. In row 2 – Q, S, P, T and R are seated (but not necessarily in the same order) and all of them are facing north. Therefore, in the given seating arrangement each member seated in a row faces another member of the other row. E and B do not sit together. T sits at one of the extreme ends. C sits next to the one who is sitting diagonally opposite (at the extreme end) to T. B sits to the right of E but none of them faces S. One person sits between C and D. Two persons sit between P and R, who does not face D. A does not sit second to the right of one who faces T. S sits next to the one who is facing D

दस लोग दो समानांतर पंक्तियों में बैठे हैं जिनमें प्रत्येक में पांच लोग हैं ताकि आसन्न व्यक्तियों के बीच समान दूरी हो। पंक्ति 1 में - A, B, D, E और C बैठे हैं (लेकिन जरूरी नहीं कि इसी क्रम में हों) और सभी उनका मुख दक्षिण की ओर है। पंक्ति 2 में - Q, S, P, T और R बैठे हैं (लेकिन जरूरी नहीं कि इसी क्रम में हों) और वे सभी उत्तर की ओर मुख किए हुए हैं। इसलिए, दी गई बैठने की व्यवस्था में एक पंक्ति में बैठे प्रत्येक सदस्य का मुख दूसरी पंक्ति के दूसरे सदस्य की ओर है। E और B एक साथ नहीं बैठते हैं। T इनमें से एक पर बैठता है चरम छोर। C उस व्यक्ति के बगल में बैठा है जो T के विकर्णतः विपरीत (अंतिम छोर पर) बैठा है। B, E के दाईं ओर बैठा है लेकिन उनमें से किसी का भी मुख S की ओर नहीं है। जो D की ओर उन्मुख नहीं है। A, T की ओर उन्मुख व्यक्ति के दायें से दूसरे स्थान पर नहीं बैठता है।

E and B do not sit together. T sits at one of the extreme ends. C sits next to the one who is sitting diagonally opposite (at the extreme end) to T. B sits to the right of E but none of them faces S. One person sits between C and D. Two persons sit between P and R, who does not face D. A does not sit second to the right of one who faces T. S sits next to the one who is facing D

What is the position of Q with respect to P?

- (1) Second to left**
- (2) Second to right**
- (3) Third to right**
- (4) Third to left**
- (5) Immediate right**

E and B do not sit together. T sits at one of the extreme ends. C sits next to the one who is sitting diagonally opposite (at the extreme end) to T. B sits to the right of E but none of them faces S. One person sits between C and D. Two persons sit between P and R, who does not face D. A does not sit second to the right of one who faces T. S sits next to the one who is facing D

Who among the following sits at middle of one of the rows?

- (1) C**
- (2) D**
- (3) R**
- (4) E**
- (5) A**

E and B do not sit together. T sits at one of the extreme ends. C sits next to the one who is sitting diagonally opposite (at the extreme end) to T. B sits to the right of E but none of them faces S. One person sits between C and D. Two persons sit between P and R, who does not face D. A does not sit second to the right of one who faces T. S sits next to the one who is facing D

Who among the following sits second to the right of the one who is facing B?

- (1) P**
- (2) Q**
- (3) R**
- (4) S**
- (5) T**

E and B do not sit together. T sits at one of the extreme ends. C sits next to the one who is sitting diagonally opposite (at the extreme end) to T. B sits to the right of E but none of them faces S. One person sits between C and D. Two persons sit between P and R, who does not face D. A does not sit second to the right of one who faces T. S sits next to the one who is facing D

Who among the following sits opposite to S?

- (1) A**
- (2) B**
- (3) C**
- (4) D**
- (5) E**

E and B do not sit together. T sits at one of the extreme ends. C sits next to the one who is sitting diagonally opposite (at the extreme end) to T. B sits to the right of E but none of them faces S. One person sits between C and D. Two persons sit between P and R, who does not face D. A does not sit second to the right of one who faces T. S sits next to the one who is facing D

Four of the following five are alike in a certain way and hence they form a group. Which one does not belong to that group?

- (1) B**
- (2) E**
- (3) P**
- (4) R**
- (5) T**

'key lock room flat' is written as 'ra lo ka fo'
'floor is key home' is written as 'nk nd fo sk'
'flat is lock house' is written as 'da ka nk ra'.

What is the code for 'floor'?

- (1) sk
- (2) nd
- (3) Either sk or nd
- (4) da
- (5) None of these

'key lock room flat' is written as 'ra lo ka fo'
'floor is key home' is written as 'nk nd fo sk'
'flat is lock house' is written as 'da ka nk ra'.

What is the code for 'room'?

- (1) lo
- (2) sk
- (3) ra
- (4) ka
- (5) None of these

'key lock room flat' is written as 'ra lo ka fo'
'floor is key home' is written as 'nk nd fo sk'
'flat is lock house' is written as 'da ka nk ra'.

'key is house' can be coded as _____.

- (1) fo da sk
- (2) nk fo da
- (3) nk fo nd
- (4) Can't be determined
- (5) None of these

'key lock room flat' is written as 'ra lo ka fo'
'floor is key home' is written as 'nk nd fo sk'
'flat is lock house' is written as 'da ka nk ra'.

Which of the following is the code for 'house'?

- (1) fo**
- (2) nk**
- (3) sk**
- (4) da**
- (5) None of these**

'key lock room flat' is written as 'ra lo ka fo'
'floor is key home' is written as 'nk nd fo sk'
'flat is lock house' is written as 'da ka nk ra'.

If 'floor house quarter' is coded as 'sk da xa' than what will be the code for 'home quarter'?

- (1) da xa**
- (2) nk xa**
- (3) sk xa**
- (4) nd xa**
- (5) None of these**

Eight persons A, B, C, D, E, F, G and H are sitting around a circular table and facing towards the centre. Some of them are males and some of them are females. No two females are sitting together. A sits 2nd to the left of C, who faces G. Two persons sit between G and B, who is a male. There are minimum 3 females in the group. D is 2nd to the right of F and none of them is neighbour of A and none of them is female. Both neighbours of A are male. H is a female and facing a male.

आठ व्यक्ति A, B, C, D, E, F, G और H एक गोलाकार मेज के चारों ओर केंद्र की ओर मुख करके बैठे हैं। उनमें से कुछ नर हैं और कुछ मादा हैं। कोई भी दो महिलाएँ एक साथ नहीं बैठी हैं। A, C के बाईं ओर दूसरे स्थान पर बैठा है, जो G की ओर मुख किए हुए है। G और B, जो एक पुरुष है, के बीच दो व्यक्ति बैठे हैं। समूह में न्यूनतम 3 महिलाएँ हैं। D, F के दायें से दूसरे स्थान पर है और उनमें से कोई भी A का पड़ोसी नहीं है और उनमें से कोई भी महिला नहीं है। A के दोनों पड़ोसी पुरुष हैं। H एक महिला है और उसका मुख पुरुष की ओर है।

Eight persons A, B, C, D, E, F, G and H are sitting around a circular table and facing towards the centre. Some of them are males and some of them are females. No two females are sitting together. A sits 2nd to the left of C, who faces G. Two persons sit between G and B, who is a male. There are minimum 3 females in the group. D is 2nd to the right of F and none of them is neighbour of A and none of them is female. Both neighbours of A are male. H is a female and facing a male.

Who among the following sits 3rd to the right of G?

- (1) A
- (2) F
- (3) C
- (4) B
- (5) None of these

Eight persons A, B, C, D, E, F, G and H are sitting around a circular table and facing towards the centre. Some of them are males and some of them are females. No two females are sitting together. A sits 2nd to the left of C, who faces G. Two persons sit between G and B, who is a male. There are minimum 3 females in the group. D is 2nd to the right of F and none of them is neighbour of A and none of them is female. Both neighbours of A are male. H is a female and facing a male.

Four of the following five are alike in a certain way and hence form a group then who among them does not belong to that group?

- (1) D
- (2) F
- (3) C
- (4) B
- (5) A

Eight persons A, B, C, D, E, F, G and H are sitting around a circular table and facing towards the centre. Some of them are males and some of them are females. No two females are sitting together. A sits 2nd to the left of C, who faces G. Two persons sit between G and B, who is a male. There are minimum 3 females in the group. D is 2nd to the right of F and none of them is neighbour of A and none of them is female. Both neighbours of A are male. H is a female and facing a male.

If all the persons are made to sit in alphabetical order from A in clockwise direction, then how many persons remain in the same position (excluding A)?

- (1) None
- (2) One
- (3) two
- (4) three
- (5) More than three

Eight persons A, B, C, D, E, F, G and H are sitting around a circular table and facing towards the centre. Some of them are males and some of them are females. No two females are sitting together. A sits 2nd to the left of C, who faces G. Two persons sit between G and B, who is a male. There are minimum 3 females in the group. D is 2nd to the right of F and none of them is neighbour of A and none of them is female. Both neighbours of A are male. H is a female and facing a male.

If in a certain way B is related to A, D is related to H then F is related to who among the following?

- (1) A
- (2) H
- (3) C
- (4) B
- (5) G

Eight persons A, B, C, D, E, F, G and H are sitting around a circular table and facing towards the centre. Some of them are males and some of them are females. No two females are sitting together. A sits 2nd to the left of C, who faces G. Two persons sit between G and B, who is a male. There are minimum 3 females in the group. D is 2nd to the right of F and none of them is neighbour of A and none of them is female. Both neighbours of A are male. H is a female and facing a male.

How many persons sit between A and E, when counted in anticlockwise direction from E?

- (1) None
- (2) One
- (3) two
- (4) three
- (5) More than three

There are six wires in a table A, B, C, D, E and F they have different length but not necessarily in the same order. E is greater than C but less than D and B. A is greater than D and B. A is not longest wire. F is 13 cm. long and E is 4 cm. long.

एक टेबल में छह तार हैं A, B, C, D, E और F उनकी लंबाई अलग-अलग है लेकिन जरूरी नहीं कि इसी क्रम में हों। E, C से बड़ा है लेकिन D और B से छोटा है। A, D और B से बड़ा है। A सबसे लंबा तार नहीं है। F 13 सेमी है। लंबा है और E 4 सेमी है। लंबा।

If D is 5cm less than F what would be the length of D?

- (a) 7
- (b) 8
- (c) 9
- (d) Can't be determined
- (e) None of these

There are six wires in a table A, B, C, D, E and F they have different length but not necessarily in the same order. E is greater than C but less than D and B. A is greater than D and B. A is not longest wire. F is 13 cm. long and E is 4 cm. long.

Which among the following is the first number from left end in step IV of the given input?

- a) 08
- b) 10
- c) 16
- d) 18
- e) None of these

There are a certain number of floors in a building. No floor is vacant. Only one person stays on each floor. The persons living on the floor are given either age or name but not both (Example: If P lives on 1st floor, then his age is not given, similarly, the one whose age is 10 lives on 2nd floor, His name is not given). The ground floor is numbered one, the one above it is numbered two and so on. There are three floors between V's floor and the floor of the one whose age is 12. The one, whose age is 30, lives immediately below V's floor. There are two floors between the one whose age is 12, and the one whose age 17. The one, whose age is 8, lives just above U's floor. The one, whose age is 17, lives just above Z's floor. The age of the person, who lives on the lowermost floor is not given. X lives on the floor which is three floors above the floor of the one, whose age is 8, lives. The one, whose age is 27, lives immediately below X's floor.

एक इमारत में मंजिलों की एक निश्चित संख्या होती है। कोई मंजिल खाली नहीं है। प्रत्येक मंजिल पर केवल एक व्यक्ति रहता है। मंजिल पर रहने वाले व्यक्तियों को या तो उम्र या नाम दिया गया है, लेकिन दोनों नहीं (उदाहरण: यदि पी पहली मंजिल पर रहता है, तो उसकी उम्र नहीं दी गई है, इसी तरह, जिसकी उम्र 10 है, वह दूसरी मंजिल पर रहता है, उसका नाम नहीं दिया गया है))। भूतल को क्रमांक एक दिया गया है, उसके ऊपर वाले को क्रमांक दो दिया गया है इत्यादि। V की मंजिल और 12 वर्ष की आय वाले व्यक्ति की मंजिल के बीच तीन मंजिलें हैं। जिसकी आय 30 वर्ष है, वह V की मंजिल के ठीक नीचे रहता है। जिसकी आय 12 वर्ष है, और जिसकी आय 17 वर्ष है, उनके बीच दो मंजिलें हैं। वह, जिसकी आय 8 है, U की मंजिल के ठीक ऊपर रहता है। वह, जिसकी उम्र 17 वर्ष है, Z की मंजिल के ठीक ऊपर रहता है। सबसे निचली मंजिल पर रहने वाले व्यक्ति की उम्र नहीं दी गई है। X उस मंजिल पर रहता है जो उस व्यक्ति की मंजिल से तीन मंजिल ऊपर है, जिसकी उम्र 8 वर्ष है। वह व्यक्ति, जिसकी उम्र 27 वर्ष है, X की मंजिल के ठीक नीचे रहता है।

There are three floors between V's floor and the floor of the one whose age is 12. The one, whose age is 30, lives immediately below V's floor. There are two floors between the one whose age is 12, and the one whose age 17. The one, whose age is 8, lives just above U's floor. The one, whose age is 17, lives just above Z's floor. The age of the person, who lives on the lowermost floor is not given. X lives on the floor which is three floors above the floor of the one, whose age is 8, lives. The one, whose age is 27, lives immediately below X's floor.

Four of the following five are alike in a certain way and hence form a group. Which of the following does not belong to the group?

- (1) The one whose age is 30 years**
- (2) The one whose age is 27 years**
- (3) The one whose age is 8 years**
- (4) The one whose age is 12 years**
- (5) The one whose age is 17 years**

There are three floors between V's floor and the floor of the one whose age is 12. The one, whose age is 30, lives immediately below V's floor. There are two floors between the one whose age is 12, and the one whose age 17. The one, whose age is 8, lives just above U's floor. The one, whose age is 17, lives just above Z's floor. The age of the person, who lives on the lowermost floor is not given. X lives on the floor which is three floors above the floor of the one, whose age is 8, lives. The one, whose age is 27, lives immediately below X's floor.

How many floors are there between U and V?

- (1) One
- (2) Two
- (3) Three
- (4) Four
- (5) Five

There are three floors between V's floor and the floor of the one whose age is 12. The one, whose age is 30, lives immediately below V's floor. There are two floors between the one whose age is 12, and the one whose age 17. The one, whose age is 8, lives just above U's floor. The one, whose age is 17, lives just above Z's floor. The age of the person, who lives on the lowermost floor is not given. X lives on the floor which is three floors above the floor of the one, whose age is 8, lives. The one, whose age is 27, lives immediately below X's floor.

What is the sum of the age of the persons living on the odd-numbered floors?

- (1) 25
- (2) 20
- (3) 39
- (4) 29
- (5) None of the above

There are three floors between V's floor and the floor of the one whose age is 12. The one, whose age is 30, lives immediately below V's floor. There are two floors between the one whose age is 12, and the one whose age 17. The one, whose age is 8, lives just above U's floor. The one, whose age is 17, lives just above Z's floor. The age of the person, who lives on the lowermost floor is not given. X lives on the floor which is three floors above the floor of the one, whose age is 8, lives. The one, whose age is 27, lives immediately below X's floor.

Who among the following lives two floors below the floor of V?

- (1) X
- (2) The one whose age is 8 years
- (3) U
- (4) The one whose age is 27 years
- (5) None of the above

There are three floors between V's floor and the floor of the one whose age is 12. The one, whose age is 30, lives immediately below V's floor. There are two floors between the one whose age is 12, and the one whose age 17. The one, whose age is 8, lives just above U's floor. The one, whose age is 17, lives just above Z's floor. The age of the person, who lives on the lowermost floor is not given. X lives on the floor which is three floors above the floor of the one, whose age is 8, lives. The one, whose age is 27, lives immediately below X's floor.

Whose age is 17 years?

- (1) The one who lives on the 7th floor**
- (2) The one who lives on the 5th floor**
- (3) The one who lives on the 2nd floor**
- (4) The one who lives on the 8th floor**
- (5) Can't be determined**

Most Expected 250 Questions (Super Series)

M, N, O, P, Q, R and S are seven people who live on seven different floors of a building but not necessarily in the same order. The lower most floor of the building is numbered 1, the one above that is numbered 2 and so on till the topmost floor is numbered 7. Each one of them has a different income i.e. 3500, 15000, 7500, 9000, 11000, 13500 and 5000. (But not necessarily in the same order.) M lives on an odd numbered floor but not on the floor numbered 3. The one who has an income of 11000 lives immediately above M. Only two people live between M and the one who has an income of 7500. The one who has an income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has an income of 15000. The one who has an income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has an income of 3500 lives immediately above the one who has an income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has an income of 9000. Q does not have an income of 7500.

Most Expected 250 Questions (Super Series)

M, N, O, P, Q, R और सारे सात लोग एक इमारत की सात अलग-अलग मंजिलों पर रहते हैं लेकिन जरूरी नहीं कि इसी क्रम में हों। इमारत की सबसे निचली मंजिल को क्रमांक 1 दिया गया है, उसके ऊपर वाली मंजिल को क्रमांक 2 दिया गया है और इसी तरह सबसे ऊपरी मंजिल को क्रमांक 7 दिया गया है। उनमें से प्रत्येक की अलग-अलग आय है यानी 3500, 15000, 7500, 9000, 11000, 13500 और 5000 . (लेकिन जरूरी नहीं कि इसी क्रम में हो।) M विषम संख्या वाली मंजिल पर रहता है लेकिन मंजिल संख्या 3 पर नहीं। जिसकी आय 11000 है वह M के ठीक ऊपर रहता है। M और आय वाले व्यक्ति के बीच केवल दो व्यक्ति रहते हैं 7500 का। जिसकी आय 15000 है वह P के ऊपर विषम संख्या वाली मंजिलों में से एक पर रहता है। O और 15000 की आय वाले व्यक्ति के बीच केवल तीन लोग रहते हैं। जिसकी आय 7500 है वह O के ठीक ऊपर रहता है। R कमाता है Q से 4000 अधिक। जिसकी आय 3500 है वह उस व्यक्ति के ठीक ऊपर रहता है जिसकी आय 5000 है। N और Q के बीच केवल एक व्यक्ति रहता है। N, Q के ऊपर किसी एक मंजिल पर रहता है। न तो O और न ही M की आय 9000 है . Q की आय 7500 नहीं है।

Most Expected 250 Questions (Super Series)

M lives on an odd numbered floor but not on the floor numbered 3. The one who has income of 11000 lives immediately above M. Only two people live between M and the one who has income of 7500. The one who has income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has income of 15000. The one who has income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has income of 3500 lives immediately above the one who has income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has income of 9000. Q does not has income of 7500.

How much income M has?

- (a) 13500**
- (b) 5000**
- (c) 7500**
- (d) 15000**
- (e) 3500**

Most Expected 250 Questions (Super Series)

M lives on an odd numbered floor but not on the floor numbered 3. The one who has income of 11000 lives immediately above M. Only two people live between M and the one who has income of 7500. The one who has income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has income of 15000. The one who has income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has income of 3500 lives immediately above the one who has income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has income of 9000. Q does not has income of 7500. **Which of the following combinations is true with respect to the given arrangement?**

- (a) 13500 - O
- (b) 15000 - R
- (c) 5000 - S
- (d) 11000 - P
- (e) 9000 - N

M lives on an odd numbered floor but not on the floor numbered 3. The one who has income of 11000 lives immediately above M. Only two people live between M and the one who has income of 7500. The one who has income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has income of 15000. The one who has income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has income of 3500 lives immediately above the one who has income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has income of 9000. Q does not has income of 7500. **If all the people are made to sit in alphabetical order from top to bottom, the positions of how many people will remain unchanged?**

- (a) Four
- (b) None
- (c) Two
- (d) One
- (e) Three

M lives on an odd numbered floor but not on the floor numbered 3. The one who has income of 11000 lives immediately above M. Only two people live between M and the one who has income of 7500. The one who has income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has income of 15000. The one who has income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has income of 3500 lives immediately above the one who has income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has income of 9000. Q does not has income of 7500. **Which of the following statements is true with respect to the given arrangement ?**

- (a) The one who has income of 5000 lives immediately below M.
- (b) R has income of 15000.
- (c) None of the given options is true.
- (d) Only four people live between P and S.
- (e) S lives immediately below Q.

M lives on an odd numbered floor but not on the floor numbered 3. The one who has income of 11000 lives immediately above M. Only two people live between M and the one who has income of 7500. The one who has income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has income of 15000. The one who has income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has income of 3500 lives immediately above the one who has income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has income of 9000. Q does not has income of 7500.

Who amongst the following lives on the floor numbered 2?

- (a) N
- (b) The one who has income of 3500
- (c) The one who has income of 5000
- (d) P
- (e) R

M lives on an odd numbered floor but not on the floor numbered 3. The one who has income of 11000 lives immediately above M. Only two people live between M and the one who has income of 7500. The one who has income of 15000 lives on one of the odd numbered floors above P. Only three people live between O and the one who has income of 15000. The one who has income of 7500 lives immediately above O. R earns 4000 more than Q. The one who has income of 3500 lives immediately above the one who has income of 5000. Only one person lives between N and Q. N lives on one of the floors above Q. Neither O nor M has income of 9000. Q does not has income of 7500.

How much income R has?

- (a) 13500**
- (b) 5000**
- (c) 7500**
- (d) 15000**
- (e) 3500**

Q & # 1 ? T @ 9 Y % 2 4 Z * & % 6 S \$ 5 @ J 7 E @ 3 ? 8 H 4

Step 1: If each letter in A-Z alphabetical series is represented by a number 1–26 respectively, then only composite number in the series is replaced by the alphabet as per its represented number

Step 2: If each letter in A-Z alphabetical series is represented by number 1–26 respectively, then only last 13 letters of A-Z alphabetical series is replaced by a second digit of its represented number. (For e.g. M – 13, then it is replaced by 3)

Step 3: Each prime number is replaced by the number which is greater than it by two.

Note: All the operations are applied individually and not step by step.

How many times numeric 9 will appear in the new series?

- a) None
- b) One
- c) Two
- d) Three
- e) Four

Most Expected 250 Questions (Super Series)

Q & # 1 ? T @ 9 Y % 2 4 Z * & % 6 S \$ 5 @ J 7 E @ 3 ? 8 H 4

Step 1: If each letter in A-Z alphabetical series is represented by a number 1–26 respectively, then only composite number in the series is replaced by the alphabet as per its represented number
