Directions: In the given series $\mathbf{A}, \mathbf{B}, \mathbf{C}$ are positive integers that are given in terms of x , y and z which are also positive integers.

$$
\mathbf{A}, \mathbf{B}, \mathbf{C}, \mathrm{D}, ?
$$

Set-1.
$x=y^{3}$
$\mathrm{y}^{10}=1024$
$\mathrm{z}=\mathrm{x}^{2}+\mathrm{xy}+\mathrm{x}$

Set-2.
$\mathrm{A}=\mathrm{x}^{2} \mathrm{y}^{3}+\mathrm{z}$
$\mathbf{B}=\mathbf{y}^{7}-\mathbf{x}$
$C=2 x y-2$
D $=x \mathbf{x}-\mathrm{x}+\mathrm{y}$
What will come in the place of '?'

1. 5
2. 0
3. -2.5
4. -1
5.10

A shopkeeper bought three items $P, Q$, and $R$ at different prices and marked them at $\mathbf{2 5 \%}, 50 \%$, and $\mathbf{4 0 \%}$ above their respective cost prices. He sold item P, Q, and R at a profit of $\mathbf{a} \%, b \%$, and $c \%$ respectively.
(1) Value of ' $a$ ' can be calculated by taking the positive value of $x$ in $4 x^{2}-43 x-255=0$
(2) Value of 'b' can be calculated by taking the positive value of $\mathbf{y}$ in $3 y^{2}-46 y-144=0$
(3) Value of ' $c$ ' can be calculated by taking the positive value of $z$ in $5 z^{2}-64 z-84=0$

The marked price of item Q is Rs. 102 more than the selling price of item P. Items $\mathbf{Q}$ and $\mathbf{R}$ together sold at Rs.1801. A discount of Rs. 272 was given on the marked price of item Q.

A shopkeeper bought three items $\mathbf{P}, \mathbf{Q}$, and $\mathbf{R}$ at different prices and marked them at $\mathbf{2 5 \%}, \mathbf{5 0 \%}$, and $\mathbf{4 0 \%}$ above their respective cost prices. He sold item P, Q, and R at a profit of $\mathbf{a} \%, \mathrm{~b} \%$, and $\mathrm{c} \%$ respectively.

The marked price of item $\mathbf{Q}$ is Rs. 102 more than the selling price of item P. Items $\mathbf{Q}$ and R together sold at Rs.1801. A discount of Rs. 272 was given on the marked price of item $\mathbf{Q}$.

What is the value of $\mathbf{3 a}+\mathbf{2 b} \mathbf{- 4 c}$ ?

1. 20
2. 25
3. 30
4. 35
5. 40

The following table shows the time taken by three persons (A, B, and C) to complete two different works ( $\mathbf{P}$ and $\mathbf{Q}$ ) individually and together.

| Table I: Showing time taken in (days) by <br> persons to complete work individually. |  |  |
| :---: | :---: | :---: |
| Persons | Work P | Work Q |
| A | 2 X | 4 X |
| B | 24 | $\mathrm{Z}=(\mathrm{M}+4)$ |
| C | X | 12 |

The value of $(X)$ can be found by solving the given quadratic equation.
I. $x^{2}-11 x+24=0$

Value of $(X)=$ (The largest root of the given equation -2 )
What is the value of $(\mathrm{Y}+\mathrm{K})$ ?

Table II: Showing time taken in (days) by persons to complete work together.

| Persons | Work P | Work $\mathbf{Q}$ |
| :---: | :---: | :---: |
| A + B | M | 16 |
| B + C | Y | K |
| C + A | 4 | N |

In a bag, there are some red, black and yellow balls. Sum of black and yellow balls is 9. Probability of selecting two red balls from that bag is $1 / 7$ which is $250 \%$ of the probability of selecting two black balls. Find number of yellow balls in that bag if the number of black balls is even ?

5.7

Direction: Each question contains a statement followed by Quantity I, II and III. Read the information clearly and answer your questions accordingly.
The options represent the relations between these three quantities
A) $>$
B) $<$
C) $=$
D) $\leq$
E) $\geq$

Quantity I: If the compound interest accrued on an amount of Rs. 15000 in two years is Rs. 3000, what is the rate of interest per annum?

Quantity II: The area of a rectangle is equal to the area of a circle whose radius is $\mathbf{6} \mathbf{~ c m}$. If breadth of the rectangle is 10 cm , what is its length?
Quantity III: 65\% of $120+y \%$ of $150=105$

1. $B, B$
2. B, C
3. $B, A$
4. E, B
5. B, D

A solid sphere is melted down and three right circular cylinders $\mathbf{X}, \mathrm{Y}$ and Z are formed. Volume (in $\mathbf{M}^{3}$ ) of each cylinder is different.

Table given below shows the difference of radius (in M) of each cylinder from that of the sphere, from which they are formed.

Note:- Ratio of volume of the sphere to its surface are = 7: 1

| Cylinders | Difference between radius of <br> sphere and radius of cylinder |
| :---: | :---: |
| X | 7 |
| Y | 14 |
| Z | 5 |

Find the sum of volume of cylinder $X$ and $Y$ if the height of both are equal to Radius of the cylinder X ?

| Cylinders | Difference between radius of <br> sphere and radius of cylinder |
| :---: | :---: |
| $X$ | 7 |
| $Y$ | 14 |
| $Z$ | 5 |

1. $10780 \mathrm{~m}^{3}$
2. $12780 \mathrm{~m}^{3}$
3. $15780 \mathrm{~m}^{3}$
4. $16780 \mathrm{~m}^{3}$
5. $18780 \mathrm{~m}^{3}$

Cylinder $\mathbf{Z}$ is melted down and 231 cubes of equal volume are formed. If the side of each cube is $\mathbf{4} \mathbf{M}$, then, find the height of cylinder $\mathbf{Z}$ ?

| Cylinders | Difference between radius of <br> sphere and radius of cylinder |
| :---: | :---: |
| X | $\mathbf{7}$ |
| Y | 14 |
| Z | 5 |

1. 12.22 M

Direction: Study the following table given below carefully and answer the question based on it.
The table given below shows the data about the university election conduct in every three years.

| Year | Total number of <br> votes cast | Total number of <br> invalid votes | Ratio of valid votes <br> cast by male to <br> females |
| :---: | :---: | :---: | :---: |
| 2000 | - | $8 \%$ | - |
| 2003 | 1200 | $5 \%$ | - |
| 2006 | 1500 | $10 \%$ | - |
| 2009 | 1750 |  | $7: 5$ |
| 2012 | - | $20 \%$ | $7: 9$ |

If in 2003 , the number of valid votes of males is 540 then what will be the ratio of valid votes of male to female in 2003?

| Year | Total number |  |  |
| :---: | :---: | :---: | :---: |
| of votes cast | Total number <br> of invalid <br> votes | Ratio of valid <br> votes cast by <br> male to <br> females |  |
| 2000 | - | $8 \%$ | - |
| 2003 | 1200 | $5 \%$ | - |
| 2006 | 1500 | $10 \%$ | - |
| 2009 | 1750 |  | $7: 5$ |
| 2012 | - | $20 \%$ | $7: 9$ |

1. $9: 10$
2. $10: 9$
3. $7: 9$
4. $9: 7$
5. $5: 4$

Total number of valid votes casted by female in 2009 is 550 then find the number of invalid votes in 2009?

| Year | Total number <br> of votes cast | Total number <br> of invalid <br> votes | Ratio of valid <br> votes cast by <br> male to <br> females |
| :---: | :---: | :---: | :---: |
| 2000 | - | $8 \%$ | - |
| 2003 | 1200 | $5 \%$ | - |
| 2006 | 1500 | $10 \%$ | - |
| 2009 | 1750 |  | $7: 5$ |
| 2012 | - | $20 \%$ | $7: 9$ |

1. 430
2. 450
3. 470
4. 490
5. 510

If total number of casted votes in 2006 is $50 \%$ more than in 2000 then find the number of valid votes in 2000?

| Year | Total number <br> of votes cast | Total number <br> of invalid <br> votes | Ratio of valid <br> votes cast by <br> male to <br> females |
| :---: | :---: | :---: | :---: |
| 2000 | - | $8 \%$ | - |
| 2003 | 1200 | $5 \%$ | - |
| 2006 | 1500 | $10 \%$ | - |
| 2009 | 1750 |  | $7: 5$ |
| 2012 | - | $20 \%$ | $7: 9$ |

1. 860
2. 920
3. 960
4. 1050
5. 1120

The difference of valid votes of male to female in 2012 is 240 then finds the number of invalid votes in 2012 election?

| Year | Total number <br> of votes cast | Total number <br> of invalid <br> votes | Ratio of valid <br> votes cast by <br> male to <br> females |
| :---: | :---: | :---: | :---: |
| 2000 | - | $8 \%$ | - |
| 2003 | 1200 | $5 \%$ | - |
| 2006 | 1500 | $10 \%$ | - |
| 2009 | 1750 |  | $7: 5$ |
| 2012 | - | $20 \%$ | $7: 9$ |

1. 450
2. 480
3. 490
4. 520
5. 640

In 2006 if the ratio of valid votes to male to female is $3: 2$ then the number of valid votes of female is what percentage of total casted votes in 2006?

| Year | Total number |  |  |
| :---: | :---: | :---: | :---: |
| of votes cast | Total number <br> of invalid <br> votes | Ratio of valid <br> votes cast by <br> male to <br> females |  |
| 2000 | - | $8 \%$ | - |
| 2003 | 1200 | $5 \%$ | - |
| 2006 | 1500 | $10 \%$ | - |
| 2009 | 1750 |  | $7: 5$ |
| 2012 | - | $20 \%$ | $7: 9$ |

1. $25 \%$
2. $30 \%$
3. $36 \%$
4. $45 \%$
5. $50 \%$
