What's Inside

How many pairs of letters are there in the word ACTIVATION', each of which has as many letters between them (both forward and backward directions) in the word as they have between them in the English alphabet?

'ACTIVATION' , ( ) ?

01. Five
02. More than six
03. Six
04. Four
05. Two

Which alphabet is 3rd from the left in the meaningful four letter word formed from the first, fourth, seventh and ninth letter of the word SEPTEMBER? If more than one word is formed, then mark the answer as X and no meaningful word is formed then mark the answer as Z.

SEPTEMBER   ,   ,

                              ?

      ,   X

                                        Z

01. T
02. X
03. P
04. Z
05. B

Eight persons are sitting around a square table. Four persons are sitting at each corner and facing outside while four persons are sitting at each side and facing inside. N sits second to the right of K. Only one person sits between N and I. M is an immediate neighbour of K and sits second to the left of the one who sits second to the left of L. H sits third to the right of J who sits immediate left of O. O does not face inside.

N, K

N   I

J   O   O

Eight persons are sitting around a square table. Four persons are sitting at each corner and facing outside while four persons are sitting at each side and facing inside. N sits second to the right of K. Only one person sits between N and I. M is an immediate neighbour of K and sits second to the left of the one who sits second to the left of L. H sits third to the right of J who sits immediate left of O. O does not face inside.

Who among the following sits opposite to N?

01. O
02. J
03. H
04. L
05. None of these

Eight persons are sitting around a square table. Four persons are sitting at each corner and facing outside while four persons are sitting at each side and facing inside. N sits second to the right of K. Only one person sits between N and I. M is an immediate neighbour of K and sits second to the left of the one who sits second to the left of L. H sits third to the right of J who sits immediate left of O. O does not face inside.

Who among the following sits second to the left of the one who sits third to the right of M?

01. N
02. I
03. H
04. L
05. None of these

Eight persons are sitting around a square table. Four persons are sitting at each corner and facing outside while four persons are sitting at each side and facing inside. N sits second to the right of K. Only one person sits between N and I. M is an immediate neighbour of K and sits second to the left of the one who sits second to the left of L. H sits third to the right of J who sits immediate left of O. O does not face inside.

How many persons sit between K and L, when counted from the right of K?

01. One
02. Four
03. None
04. Three
05. None of these

Eight persons are sitting around a square table. Four persons are sitting at each corner and facing outside while four persons are sitting at each side and facing inside. N sits second to the right of K. Only one person sits between N and I. M is an immediate neighbour of K and sits second to the left of the one who sits second to the left of L. H sits third to the right of J who sits immediate left of O. O does not face inside.

Four of the following five pairs are alike in a certain way so form a group. Which of the following does not belong to that group?
01. NI
02. MO
03. HL
04. JK
05. OL

Eight persons are sitting around a square table. Four persons are sitting at each corner and facing outside while four persons are sitting at each side and facing inside. N sits second to the right of K. Only one person sits between N and I. M is an immediate neighbour of K and sits second to the left of the one who sits second to the left of L. H sits third to the right of J who sits immediate left of O. O does not face inside.

Who among the following sits second to the left of H?

01. I
02. N
03. K
04. L
05. None of these

Eight persons Z, Y, X, W, O, J, I and H are living in a fourstory building such as ground floor is numbered as 1, above it is floor 2 and so on till the topmost floor is numbered as 4. Each of the floors has 2 flats in it viz. flat1 and flat2. Flat1 of floor2 is immediately above flat1 of floor1 and immediately below flat1 of floor3. In the same way, flat2 of floor2 is immediately above flat2 of floor1 and immediately below flat2 of floor3 and so on. Flat1 is in the west of flat2. Two floors gap between O and W but they do not live in the same flat. H lives on an odd numbered floor and to the west of Y's flat. One floor gap between the floors of O and X and they live in the same flat. Z is living above J's floor in the same flat. O lives on an even numbered floor. I is living in an even numbered flat.

Z, Y,
2 .   2   1 ,   1   1
          3   1   ,   2
          2   1   2   3

One floor gap between the floors of O and X and they live in the same flat. Z is living above J's floor in the same flat. O lives on an even numbered floor. I is living in an even numbered flat.

Which of the following combination is/are true?
01. Z Flat 1
02. H Floor 3
03. All are true
04. I Floor 1
05. Y Flat 2

Statements:

O > U > L ≤ B; L ≥ C > A

Conclusions:

I. C < B

II. C = B

01. If only conclusion I is true.
02. If only conclusion II is true.
03. If either conclusion I or II is true.
04. If neither conclusion I nor II is true.
05. If both conclusions I and II are true

Statements:
Q ≥ A > D = E; L< D < N

Conclusions:
I. N < Q
II. Q > L

01. If only conclusion I is true.
02. If only conclusion II is true.
03. If either conclusion I or II is true.
04. If neither conclusion I nor II is true.
05. If both conclusions I and II are true

Statements:

O > S ≥ C ≥ B < G = T

Conclusions:

I. S ≥ B

II. C ≥ T

01. If only conclusion I is true.

02. If only conclusion II is true.

03. If either conclusion I or II is true.

04. If neither conclusion I nor II is true.

05. If both conclusions I and II are true

Statements:

K < Q ≥ R > U < C ≥ H

Conclusions:

I. U < K

II. Q ≥ C

01. If only conclusion I is true.
02. If only conclusion II is true.
03. If either conclusion I or II is true.
04. If neither conclusion I nor II is true.
05. If both conclusions I and II are true

Eight members of a family are living in a house, in which two are married couples. M is the father of W. V is married to M. T and W are siblings. X is married to T. M has no son. P is the father of V. J is the only son of X. Z is the brother-in-law of M.
