Directions : Rearrange the following statements, so that a meaningful paragraph is formed.

A. When sleeping at the edge of a group, mallards keep one cerebral hemisphere awake and the corresponding eye open and directed away from the other birds, toward a potential threat.

B. Based on these findings and the fact that dolphins can swim while sleeping unihemispherically, it is commonly assumed that birds also rely on this sort of autopilot to navigate and maintain aerodynamic control during flight.

C. How might a bird sleep in flight without colliding with obstacles or falling from the sky?

D. However, it is also possible that birds evolved a way to cheat on sleep.

E. One solution would be to only switch off half of the brain at a time, as Rattenborg showed in mallard ducks sleeping in a dangerous situation on land.

CEABD

A. What is a Biocentric ethics to specific?

B. Biocentric ethics calls for a rethinking of the relationship between humans and nature.

C. It states that nature does not exist simply to be used or consumed by humans, but that humans are simply one species among many.

D. It also states that, since we are part of an ecosystem, any action which negatively affects the living systems of which we are a part adversely affects us as well, whether or not we maintain a biocentric worldview.

E. Biocentrists believe that all species have inherent value, and that humans are not superior to other species in a moral or ethical sense.

ABCDE

A. And also in realities like doctors not understanding the damage a drug such as Vioxx — a painkiller withdrawn from the market in 2004 because it increased risks of heart attack and stroke — can do until it's too late for thousands of patients.

B. He added that he's encouraged that medical students seem enthusiastic about data science.

C. The medical industry, Kohane said, doesn't utilize the vast amount of data it routinely gathers at anywhere close to its potential.

D. That results in missed opportunities for cost savings in an industry that accounts for 15 percent of the U.S. gross domestic product.

E. “For me, this is the way we're going to change medicine.”
